Spec it. Submit it. Get paid.

Forecourt owner/Operators: Claim Up to £1,500 Back For Specifying Best-in-Class Equipment.

When site owners specify and install PFS Fueltec on your forecourt project, we pay you back, in **credit or cash**.

What is PFS Payback?

If your forecourt project specifies PFS Fueltec products, you can earn up to £1,500 back on qualifying jobs:

- New-To-Industry Sites
- Tank Replacements
- Re-pipes
- Knock Down Rebuilds

Choose Your Reward!

- 100% Value as PFS Trade Account Credit: Spend on maintenace items for your netowork such as signage, fill adaptors/caps/padlocks etc
- OR 50% Cash Rebate: If you'd prefer money in the bank

How Payback Works:

- Architect uses our pre-written specs on their drawings
- You upload the site drawings via our 60-second online form
- 3. Once a qualifying order is complete we credit the site owner with their payback

Order Value	Payback	
£7.5k - £9,999	£250	
£10k - £14,999	£500	
£15k - £19,999	£750	
£20k - £24,999	£1,000	
£25k - £29,999	£1,250	
£30K +	£1,500	

Who Wins?

The Association for Petroleum and Explosives Administration

Established 1958

Aims and objectives of the APEA:

The advancement of scientific, technical and legal knowledge required in the administration of the Petroleum & Explosives and associated environmental legislation.

To facilitate the interchange of information, ideas and practice on all matters pertaining to Petroleum & Explosives and associated environmental legislation.

To attain, so far as is practicable, uniformity in the administration of this legislation.

To establish the formation of branches in the United Kingdom and other Countries.

To co-operate with other bodies having similar objectives to those of the Association, to act as an authoritive body for consulting with government, public bodies and other in matters of public, professional and scientific interest concerning petroleum, explosives and associated environmental law.

APEA Membership and Information

The Associationcomprises Individual Members, Corporate Members, Fellows, Honorary Members, and Retired Members. The APEA is managed by the National Council, consisting of Officers of the Association, four people elected from the Membership, and representatives from local branches.

The APEA has grown rapidly and continues to gain strength and recognition in its field of work. The APEA is a Company Limited by Guarantee. The Association's membership year runs for 12 months from joining or renewal.

Membership of the APEA offers you a host of benefits from discounts to events

- Copy of The Bulletin perquarter
- Copy of the APEA Yearbook
- Discounts on APEA Training
- Use of the APEA logo
- Connect with your colleagues

For more information contact Helen Shears or Christine Joyce at admin@apea.org.uk or telephone + 44 (0) 345 603 5507.

To join the APEA please visit: apea.org.uk/join

SOMETHING FOR EVERYONE

GreenChem go contactless

As part of their ever-developing system hardware offerings GreenChem have developed a "contactless" payment system for retail AdBlue dispensing tanks for Trucks, Vans and passenger cars.

The contactless system ads a further option to the growing retail range of tanks GreenChem have on offer. The new Smart Retail range is available in three sizes depending of available space for the dispensing tank and the potential volume the site will sell. All tanks are MID approved retail heads and can be placed in most locations, it does not even have to be a forecourt!

Anywhere there is a high volume of passenger cars could be a useful location, even a carpark. With a move towards unmanned sites and contactless payments, which is encouraged during the current global conditions makes this a safer, cost effective solution. All that is required is a power supply and a flat level surface big enough to place the tank. The payment transactions and telemetry for tank refills are GPRS based, no civils are required! There are several financing options available.

The model is also available, connected directly to the till and can facilitate both truck and car nozzles in any combination. Purpose built tanks sizes are also available depending on the sites space availability.

AC Cable Solutions

Stand A9

AC Cable Solutions is a specialist manufacturer and supplier of cable accessories based in Trafford, Manchester. Led by Andrew Leach and Carl Pike, we provide high-quality products and exceptional service to all sectors, from wholesalers to OEMs. We specialise in sealing cables and pipes, offering solutions from cable glands to duct sealing systems for industrial and hazardous areas.

Our products include DuctSeal LG, DuctSeal HG, and DuctSeal FR,

utilising our renowned GreyStuff and RedStuff Sealants, proudly manufactured in Britain. In partnership with Kraso GmbH of Germany, we offer mechanical seal systems, including customised seals that can be manufactured within 24 hours and shipped worldwide within 10 days.

We stock a wide range of cable accessories, including ATEX glands, reducers, adaptors, earth bars, lugs, and crimps. Our certifications include ISO 9001 and DuctSeal FR tested to **BS EN 1366-3:2021**, ensuring compliance with industry standards. Get in Touch! Visit our information hub at www.accablesolutions.com or purchase products online at www.cableglandsuk.com.

Adler and Allan

Stand A1

Adler & Allan are the UK's biggest supplier of management, maintenance and transformation services to the downstream market including forecourt owners, major retailers and petroleum suppliers.

With nearly 100 years' experience in all aspects of petroleum servicing we are often chosen as the preferred contractor to the UK's leading petroleum companies and forecourt operators.

APEA

Stand A23

The APEA is a UK based organisation, drawing membership from all quarters of the petroleum industry, including regulators from national and local government authorities, oil companies, equipment manufacturers and suppliers, service and installation organisations, training establishments and many others. It is seen to be unique in representing all sides of the industry and in providing a forum for debate and the generation of technical guidance.

Contact Us

+44 (0) 345 603 5507

admin@apea.org.uk (Helen Shears)

www.apea.org.uk

Berewyk Hall Court, Bures Road, White Colne, Essex CO6 2QB

The APEA was founded in 1958. Some 30 petroleum-licensing enthusiasts started the Association in the West Midlands and their objectives still hold true today:

- The advancement of scientific and technical knowledge
- The supply and interchange of information
- Uniformity of standards interpretation and application

Today the organisation has over 1100 members spread across many countries all over the world. In the UK and Europe we encourage organisation of branches. Currently there are seven branches in the UK and one in Ireland. Members receive a quarterly magazine, The Bulletin and also a Yearbook (desk diary) free of charge. Membership includes discounts on APEA training courses and the purchase of publications from the APEA website including the 'Guidance for Design, Construction, Modification, Maintenance and Decommissioning of Filling Stations (Revised Nov 2024)', technical advice and access to the industry network.

Bever Innovations

Stand D8

Bever Innovations is a manufacturer of intelligent, high-quality LED solutions for the international fuel retail industry.

As a technical innovator, Bever Innovations has gained a leading position in the fields of:

Intelligent LED Downlights and Area Illumination:

Higher energy efficiency, wireless communication between lights, configure and connect with Bever app.

Contact Us

07860 82 88 88

hgr@beverinnovations.com

fuel.beverinnovations.com

ITechniekweg 2, 4301 RT Zierikzee The Netherlands

LED Price Displays:

The perfect LED display for your price sign, no compromises on visibility or your corporate identity.

EV-Integration:

The IC-Smart, a cutting-edge interface converter, seamlessly integrates POS and EV protocol data streams, allowing petrol station owners to display transparent pricing for traditional fuel and electric charging on existing or new LED price signs, all while offering real-time charger availability for EV chargers.

LED Screens:

The LED screen functions as a price display, information screen, and marketing tool in one.

LED Shop Illumination:

Energy savings, whilst enhancing customer shopping experience.

Bever Smart Technology:

Connectivity for operational efficiency and intelligence is at the heart of Bever Innovations' technology and integrated in all our products. Our Bever Dashboard enables remote asset management, while the Bever App facilitates fixture and process management, seamlessly integrating with back-office systems to save and protect your assets.

Berrys Technologies Limited Stand D2

Berrys is a world leader in fuel transport solutions. With a number of innovative products best known for improving maintenance and seamless on-site integration. Bespoke and made to order for each client.

Once labelled a forecourt equipment supplier, Berrys have successfully been at the forefront of technology used across the downstream petroleum industry in recent times. With a number of products revolutionising forecourt installation. Mono chambers, Easy Riser and Fill master, all play a vital part in reducing cost, risk and time on-site.

Contact Us

01215 58441

enquiries@berrys.com

www.berrys.com

141 Lichfield Road, Aston, Birmingham, **B6 5SP**

Paving the way for the future is a common occurrence at Berrys. In 2011 they cracked the mis-fuel phenomenon, with an optic sensor which could determine fuel types by their density values. Providing retailers with a sense of security, never having to worry about cross contamination. However, the core of Berrys success remains close to home. Rapid delivery speeds and in house fabrication - the heart of the business. Manufactured equipment bespoke and made to order for each client.

BigBrother International

Stand A10

With the World's Smartest Security Technology platform "Watch-it" BigBrother sets an advanced standard in video surveillance, security and video insights for fuel, energy, and convenience retailers throughout Europe with technology that increases returns and moves security from a cost driver to a business driver.

Watch-it for mobility is designed to integrate with other systems onsite like the Forecourt controller and POS system. Watch-it is a module based all in one platform with lots of different functionalities for driveoff prevention, central control and much more.

info@easefix.com

www.easefix.com

167-169 Great Portland Street, Fifth Floor, London, England, W1W 5PF

With over 40 trades under one roof and a network of 7,500+ fully vetted, qualified professionals, Easefix handles everything from electrical and plumbing repairs to roofing, signage, glazing and reactive maintenance. Whatever the issue, our team is available 24/7 nationwide, offering rapid 60-90 minute response times, transparent pricing, and a 90 day workmanship guarantee.

Easefix isn't just a service; it's a trusted, nationwide brand that stands for excellence, reliability and professionalism. When you partner with us, you're choosing a team that keeps your business running at its very best.

Elaflex

Stand D6

ELAFLEX is a specialist company in safe connections for the transfer of dangerous goods and sensitive fluids. Our strength are standards compliant, long-lasting hoses, fittings, couplings, expansion joints, hose reels and nozzles. As an internationally family company with a long history, we combine experience and competence. In the past, it was commonplace to use products for decades. The modern consumer world has long since taken a different path, and the trend towards

01992 452950

sales@elaflex.co.uk

<u>www.elaflex.co.uk</u>

Riverside House, Plumpton Road, Hoddesdon, Hertfordshire, EN11 0PA

short-lived disposable products has also affected many sectors of industry. For some, this path is attractive; after all, the market rewards low prices with high demand. However, in manufacturing this results in a cycle of increasingly inferior goods, higher wear and tear, greater use of scarce resources and more waste. Elaflex takes a different approach. Our products are low maintenance with an outstanding life expectancy across the board. The low cost of ownership compensates for a higher purchase price many times over. The economic advantage for our customers is only one side of the equation. The environment also benefits directly when products are not designed with planned obsolescence but are replaced far less frequently. The durability protects resources, reduces waste and therefore improves the carbon footprint.

ElectRoad

Stand B2

ElectRoad is a fast-growing regional network of electric vehicle (EV) charge points across the east of England, supplying 100% green electricity. We partner with forecourts and convenience stores to turn car parks into high-value charging destinations that attract new customers and future-proof your business.

Contact Us

01986 502000

<u>info@electroad.uk</u>

www.electroad.uk

Loddon Road, Broome, Bungay, Norfolk NR35 2RI

Our model is simple — we handle installation, operation,

and maintenance, so you can focus on your core business while benefiting from increased footfall and dwell time. With a proven track record of reliability and driver satisfaction, ElectRoad delivers a seamless charging experience supported by real-time monitoring and smart software.

By joining the ElectRoad network, your site becomes part of the clean-energy transition — supporting local sustainability while generating new revenue streams. Together, we'll keep drivers powered, engaged, and coming

ElectRoad — Local power. Clean transport. Real opportunity.

Green Spark

Stand D1

With innovative approaches to providing compliance and drainage services, Green Spark is the trusted choice for many leading national brands in the PFS, 3PL, and retail sectors.

- Pollution prevention providing proactive brand protection via knowledge and infrastructure control - Major brands need major protection.
- Site drainage systems have a liability as pollution pathways into the environment. Green Spark manages this pollution risk - before it happens: "low culpability" versus "negligent".

Come along to our stand at APEA, and never endure a long wait to solve a drainage problem again.

GripHero

Stand A7

With a decade of specialising in fuel handling consumer safety practices, GripHero are leading global experts in the consumer safety laws that govern fuel handling at petrol stations.

These laws can be summarised by the simple mantra: "Warn, Inform, Instruct and Protect"; and can be easily complied with in the UK and EU by displaying the correct CLP hazard labels, and using the correct PPE, all provided in the correct location.

Contact Us

01837 811035

info@griphero.com

www.griphero.com

Units 1&2, Hatchmoor Industrial Estate, Hatherleigh, Devon, EX20 3LP

For fuel retailers, GripHero enables all-in-one compliance with the various chemical hazard labelling, PPE and Health & Safety regulations around the world; protecting insurance validity, business operations, employees and consumers. This is more important than ever before, now that Petrol has itself been reclassified by the International Agency for Research on Cancer (IARC) as a Group 1 cause of human cancer.

Ingeni Renewables

Stand B9

With over 60 years' experience in civil engineering and electrical projects in the forecourt retail sector, Ingeni Renewables was created to meet the growing demand for green solutions. With its roots as a department in a well-established electrical company, it became an independent company in January 2023.

The company had an initial focus on solar photovoltaic (PV) and has

More recently the INNOVENT low level vent system won the APEA Innovation award, maintaining the company's reputation for innovative new products ademark of the business for the last 100 years into the next centenary.

100 years after the company was first formed, we are celebrating with the latest overfill device, the DEAD-STOP, a zero-leak rate valve aimed at the generator and smaller tank market.

With other new products under design Risbridger are striving to carry the reputation of engineering excellence that has been the trademark of the business for the last 100 years into the next centenary.

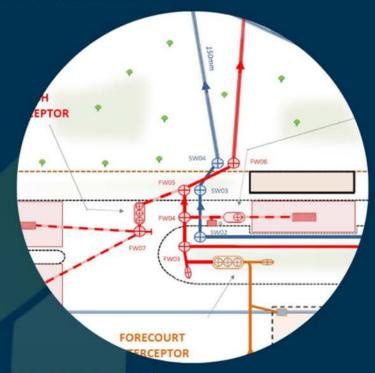

Every now and then there is a seismic shift in markets, and the forecourt sector is experiencing that change.

But what about underground? That should be seismic too.

Drainage systems carry pollution risk potential through the pollution pathway and old aged systems block and silt up, damaging those new creative customer experiences.

At Green Spark we think differently about drainage systems.

We have a proactive approach to drainage management.

We understand your site from the ground down - then optimise performance and cost.

Next time you need a drainage service don't call any contractor - call Green Spark and discover a smarter, more efficient way to get the job done.

As the main sponsor of the APEA Awards evening. We are pleased to be your brand for national drainage solutions, delivering compliance and operational performance.

SOLUM

Stand A13

In the UK, our team of dedicated engineers, account managers, and project managers provide expert support from start to finish - helping you design, install, and maintain the right solution for your business.

Our comprehensive product range includes car washes, jet washes, tunnel systems, and commercial truck washes, as well as high-performance wash, chemicals and advanced water recycling systems designed to reduce environmental impact and operating costs.

WashTec also offers an online parts shop, making it easy to order genuine WashTec components, accessories, and chemicals quickly and confidently.

Combined with our nationwide service network and financing options, we provide everything you need to building and maintain your valeting business.

Wherever you are in your journey, WashTec's global expertise and local support are here to help you succeed.

Taking care of your health and safety

Keeping your business, the environment and people safe is your top priority – and like most things, if done well, takes time and knowledge. Regarded as a leader in Health & Safety management, Suresite is ready to help you meet all of your obligations for a safer and happier business environment.

Safety first

Whatever your business, from retail premises to petrol forecourt, from hospitality to professional services, you have a responsibility to operate safe and compliant premises. We have been carrying out Health & Safety risk assessments across the UK and Ireland for over 27 years, and we can take care of yours too:

Flexible audits and assessments – most assessments can be specifically adapted to suit the unique needs of your business.

Save time – we will guide you through the whole process and identify the areas for action, so you know exactly what to do.

Full regulatory compliance – let us help keep you and your business safe, avoiding fines and criminal offences.

Affordable – as an independent business we tailor our pricing to suit your business needs, ensuring we stay competitive.

Improved customer experience – people prefer to choose a business environment that feels safe and organised.

Premier service – real person, UK based support with subject matter expertise in Health & Safety.

Dedicated support – you'll be assigned a dedicated assessor who will be your point of contact to offer ongoing guidance and support.

Staff wellbeing – our assessments include staff wellbeing, from lone working to violence and aggression in the workplace.

Embed a safety-first culture – we will discuss our report findings with you onsite to ensure a full understanding of any issues and actions required.

YOUR HOST MATT DAWSON MBE

Possibly the best scrum half in the world, Matt's performance in the World Cup-winning England rugby team, and especially his pass that led to the winning kick, earned enormous respect within the sport. A former England captain, Matt is a proven leader and a natural team player and he combines his playing experience with his more recent business lessons to consider the nature of teams, leadership and performance culture. He's also an accomplished presenter of conferences and awards.

& COMEDY BY TIM VINE

Tim is holder of the world record for the most jokes told (and laughed at) in an hour: 499. After Not Going Out he wrote a Bumper Book Of Silliness and has sold out theatres across the country with his relentless stream of one-liners and puns.

GreenSpark

APEA AWARDS HEADLINE SPONSOR

GREEN SPARK

A word or two from your new Awards night sponsor

We began our journey over 15 years ago when we felt that some large companies were seeking improvements to their pollution risk profile. Our pathway has taken us deeply into the warehousing logistics sector, automotive, and now retail forecourts.

We see the issues this sector faces around unknown (and sometimes complex) forecourt drainage systems that have been altered from their origin and will continue to be altered into the future. We see the inconstancies of managing wash areas and reclaim plants, and yet there is a need for understanding and ultimately operating and managing each retail location, compliantly.

Compliance means licensing and permitting of course, but also it means robust proactive controls that go beyond just 'periodic forecourt interceptor visits' but get to the heart of drainage flows, and control points. Unsurprisingly once all is properly unveiled and displayed, management of these drainage assets becomes easier, and more cost effective.

We are different - bridging the gap between contractor and consultant to deliver proactive, effective, and compliant operational solutions. As more of the sector gets to know us, we look forward to driving greater value and compliance together.

If you have any drainage issues, especially strategically, please speak with any member of our team. We operate nationwide, and we're always happy to help.

Enjoy the show, and the evening. We hope to see you, if not tonight then sometime soon.

APEA PRE-AWARDS DINNER DRINKS RECEPTION SPONSOR

GREENCHEM SOLUTIONS LTD

GreenChem is an innovative producer of AdBlue® and the hardware required to dispense safely into your vehicles. We have been manufacturing and supplying AdBlue® since 2005.

As one of the UK's most established and leading AdBlue® manufacturers, also the second largest in Europe, GreenChem plays a pivotal role within the industry. In fact, we pioneered the word AdBlue® which was later past to the VDA.

GreenChem delivers reliability and flexibility through our expansive fleet of dedicated bulk delivery tankers and an extensive network of exclusive production sites and distribution centres, ensuring that we can supply any of our customer's needs.

Across Europe, we have more than 50 AdBlue® production sites and three Urea manufacturing facilities, alongside sister companies.

GreenChem is part of the AGROFERT group, which consists of over 200 subsidiaries.

Together, we are one of Europe's largest producers of nitrogen fertilizers and Urea, an integral raw material to AdBlue® production.

AdBlue® is crucial in reducing harmful emissions from diesel engines by utilizing SCR (Selective Catalytic Reduction) technology, allowing vehicles to meet strict Euro emission standards.

AdBlue® is a colourless, highly purified liquid comprises demineralized water and 32.5% urea. Internationally, it is also referred to as DEF, ARLA 32, or AUS 32."

GreenChem works towards a greener future and a cleaner environment.

APEA MILESTONE AWARD SPONSOR

LCM ENVIRONMENTAL

With more than 35 years of expertise, LCM Environmental are trusted specialists in fuel, energy and infrastructure, helping organisations across the UK maintain safe, compliant and efficient operations. Our work spans the full lifecycle of asset management, from design and installation to maintenance, remediation and incident response.

Our capabilities cover every stage of infrastructure performance, including industrial cleaning, forecourt design, build and modification, fuel system testing and compliance, and life asset extension through structured maintenance and upgrades. We deliver specialist infrastructure solutions that protect critical assets, minimise downtime and ensure full regulatory confidence across complex and restricted-space environments.

Every service we provide is shaped around four core priorities that define our approach. Compliance and Risk Control underpins everything we do, demonstrating proven control, documentation and accountability in all aspects of fuel management and environmental safety. Operational Continuity and Performance ensures our clients benefit from reliability, uptime protection and smart maintenance practices that prevent costly outages. Prevention Through Planning turns reactive maintenance into structured, preventative programmes that extend asset life and improve efficiency, and Environmental and Incident Readiness gives partners the confidence that, should the unexpected happen, LCM are ready to respond quickly, effectively and with complete transparency.

LCM Environmental operate within high-risk, restricted spaces across sectors that include Forecourt & Retail, Power & Utilities, Aerospace, Defence & Military, and Transport & Logistics, collaborating with end customers and specialist contractors to ensure every project is delivered safely, efficiently and in full compliance.

APEA ENVIRONMENTAL PROTECTION AND SUSTAINABILITY AWARD SPONSOR TITAN CLOUD

Titan Cloud delivers the industry's leading Energy Asset Optimization platform, helping operators manage wetstock management, cut fuel supply and logistics costs, reduce environmental compliance risk, optimize maintenance spend, and grow revenue.

Implementing our technology means continuous access to solid data, guided by continued support from our UK-based wetstock management specialists. Our technology enables immediate detection of fuel variances, automatically identifying issues such as leaks, water ingress, or theft in real-time.

With the recent acquisition of best-in-class maintenance solutions Urgent and Techniche EV from Techniche Limited, Titan Cloud has expanded beyond traditional fuel assets to include a broader range of site equipment and EV infrastructure.

Titan Cloud Wetstock: Your Flexible, Compliant & Cost-Effective Solution

- Software-Only or Guardian Devices: Choose the option that best fits your needs
- Full Regulatory Compliance: We ensure adherence to industry standards and regulations
- Enhanced Efficiency: Optimize margins, maximize uptime, and reduce administrative time
- Premier Support: Access our UK-based expert team for dedicated assistance
- Real-Time Monitoring: Ensure accurate stock management and rapid response to variances
- Environmental Responsibility: Minimise any potential adverse impacts on your local communities and the environment

Key Benefits & Unparalleled Support

- Lifetime Warranty and 100% Uptime: Redundant system ensures uninterrupted operation
- Online Web Portal: Access real-time data and customizable reports
- Key Reports: Track variances, leaks, alarms, and more
- Site Requirements: ATG and forecourt controller
- Compatibility: Works with all major forecourt controllers and tank gauge systems

APEA BEST NEW FUEL INSTALLATION NON RETAIL AWARD SPONSOR

INDUSTRIAL SERVICES LTD

Carmichael and Baxter Industrial Services Ltd Carmichael and Baxter Industrial Services Ltd is a wellestablished and prominent Fuel Service provider located in Fife, Scotland. In 2014, the company was acquired by Managing Director Peter Carmichael of Carmichael & Baxter Groundworks, with a primary focus on fuel site installation and maintenance. Under the leadership of Peter and his fellow directors, we have evolved into a comprehensive main contractor and subcontractor, serving both the Military Full Time and Reserve Forces.

Our services are regularly utilised alongside our sister company, Carmichael & Baxter Groundworks, across various sectors, including the Ministry of Defence, Public Transport, Emergency Services, Haulage and Logistics, Agricultural sites, Marinas, Retail and Commercial Fuel Sites, and Local Authorities. Industrial Services boasts a skilled team of over 70+ professionals, maintaining its position as a market leader across Scotland in fuel, mechanical, and electrical services. We have established ourselves as the largest B2B provider in Scotland, specialising in forecourt and bulk fuel installations while meeting all fuel pump needs and storage solutions.

Our electrical division has recently undertaken extensive projects, including the installation of EV chargers, military hangar fit-outs, and multi-transport fuel infrastructures. Last year marked the growth of our mechanical and engineering sector with the successful acquisition of PPS Ayrshire, a well-established complementary fuel firm located on the west coast. Operating from our new offices in East Kilbride, this acquisition enhances our service coverage throughout Scotland, ensures quicker response times, and allows us to offer more competitive pricing to both new and existing clients.

Following on from last year's success we have acquired a further arm to our business with the procurement of JJEM Plumbing and Heating.

APEA BEST FORECOURT PROJECT AWARD SPONSOR

VARS TECHNOLOGY LTD

VARS Technology works with thousands of petrol stations to protect against the threat of crime, antisocial behaviour and disruption, ranging from fuel and retail theft to fly tipping and problem parking. Market-leading ANPR prevents millions in fuel theft every year by notifying forecourt staff of problem vehicles as soon as they enter the forecourt. This provides staff with the warning needed to prevent them authorising the pump unless payment is made in advance, preventing drive-offs before they happen. For a typical forecourt, VARS ANPR can reduce drive offs by up to 90%.

VARS Technology's extensive claims team works to recover the money from any drive-off or no means of payment incidents that do happen. Every penny of over £2.8 million recovered during 2024 went straight back to forecourt operators.

The same ANPR and debt recovery systems can be used by forecourts to manage and monetise parking, issuing fines to problem vehicles and ensuring that limited spaces on-site are kept free for paying customers. The small number of parking spaces on many forecourts often means that large parking providers aren't interested. Instead, forecourts using ANPR to protect themselves against drive offs can use their VARS system to manage parking at no additional cost, with any revenue generated by parking enforcement shared with the customer.

VARS Technology is the only ANPR forecourt protection provider to hold Police Preferred Specification from Secured by Design, an official police security initiative for products proven to boost security following a rigorous testing process.

APEA INNOVATION AWARD SPONSOR

PREMIER SERVICE LTD

Premier Service Ltd is one of the UK's leading providers of maintenance and engineering services to the retail and commercial fuelling industry. With decades of experience supporting forecourts nationwide, we deliver reliable, efficient, and professional solutions that keep your sites operational and compliant.

We specialise in pump and dispenser servicing, calibration, vapour recovery, tank and line testing & electrical testing.

As a trusted partner to leading fuel retailers and commercial operators, we pride ourselves on our fast response times, transparent communication, and engineer expertise. Our national network of field service engineers and our advanced service desk ensure downtime is minimised and every job is tracked through to completion.

In-house workshops and a large stock holding mean we can dispatch most parts straight away to ensure fast fixes.

We're also committed to sustainability and innovation and can provide cost saving accident damage repairs and upgrade services, ensuring prolonged life to your hard working assets.

At Premier Service, our mission is simple: to deliver safe, smart, and dependable forecourt support so our clients can focus on serving their customers.

Premier Service Ltd – Solutions. Integrity. Professionalism. Growth. People. Respect. Teamwork. Visit www.premierserviceltd.co.uk to learn more.

APEA LIFETIME ACHIEVEMENT AWARD SPONSOR

ELAFLEX

Business with a Sustainable Mindset

WE ARE COMMITTED TO RELIABILITY, CONTINUITY, INNOVATIVE SPIRIT AND FLEXIBILITY

The increasing demand for mobility is a megatrend driven by global effects such as globalisation and the urbanisation of our societies.

Elaflex, as the globally leading equipment system supplier of gas and liquid handling technology, is part of the mobility chain. As a family business with a history of over 100 years, we are convinced, that only by continuing to act responsibly and with foresight will we be able to make a relevant contribution to society and operate successfully in the future.

We regard sustainability and corporate responsibility as central components of our values and corporate strategy. Our passion and determination have never been greater than now to find an economically and environmentally balanced approach that benefits and protects our planet, and our society in equal measure. Our commitment goes far beyond just compliance with regulatory and legal requirements.

Our commitment is to the development of user friendly technically advanced equipment, built to last. We have developed: The Elaflex N-LH2 nozzle and hose assembly which provides the first solution for LH2 truck refuelling of liquefied hydrogen. Our H2 hoses has very low permeation.

The new type ERV-H2+ rubber expansion joint is suitable for the transfer of up to 100% hydrogen as well as for 100% methane or other mixtures, such as 'Hythane'.

For loading and unloading of trailers with compressed H2 hydrogen we have expanded our product range to include ball valves, check valves and quick couplings up to DN 25 (1") for the high-pressure range.

Our equipment allows much higher flow rates than conventional H2 refuelling components.

We also offer a range of equipment suitable for rDME.

APEA CONNECTION LOUNGE SPONSOR

PFS FUELTEC

As one of the UK's leading distributors of fuel system equipment and road tanker parts, PFS Fueltec has built its reputation on helping contractors, forecourt operators and critical power installers deliver safe, efficient and compliant installations. With depots in Essex and Scotland, we provide a true one-stop-shop for everything from pipework, valves and leak detection systems to tank gauges, dispensers and signage – all backed by expert guidance and fast delivery.

This year at APEA Live, we're proud to sponsor the event and introduce our new PFS Payback Programme – a simple, rewarding initiative for forecourt owners and architects who specify PFS Fueltec equipment on new-to-industry sites, re-pipes, tank replacements or knock-down rebuilds. By submitting your site drawings through our quick online form, qualifying projects can earn up to £1,500 back in either account credit or cash.

It's our way of saying thank you to those who continue to specify best-in-class equipment and trust PFS Fueltec as their go-to partner for project success.

Visit us at Stand A4 to discover how our products and services can simplify your next installation, unlock cost savings, and keep your network running smoothly. Whether you're an installer, site owner or specifier – PFS Fueltec helps you spec it, submit it, and get paid.
